Part III DETAILED ACTION

1. This application has been examined. Claims 1-33 are pending in this application.
2. Applicant should update the information related to the continuation or divisional application(s) on page 1.
3. Second claim 21 on page 9 of amended claims submitted 2/20/07 should be changed to claim 22. Correction is required.

Double Patenting

4. The claims 1-33 are rejected under the judicially created doctrine of the obviousness type double patenting of the claims in applicant's prior United States Patent No. 7,016,056. Although the designs are not identical, they are not patentably distinct from each other because both the pending application and the United States Patent No. 7,016,056. Claims are directed to the same invention. (e.g. claim 9 from the current application recites an authoring tool that assists author in building an automated troubleshooter for a product, having a cause editor, an action editor, a question editor, and the action relating to a series of categories, claims 3-6 of the US Patent No. 7,016,056, clearly teaches the means, with their respective functions. The obviousness type double patenting rejection is a judicially established doctrine based on public policy, and is primarily intended to prevent prolongation of monopoly by prohibiting a claim in a second patent not patentably distinguishable from a claim in a first patent.

Art Unit: 2625

A timely filed terminal disclaimer will obviate this rejection. (MPEP § 1490) *In re Vogel*, 164 USPQ 619 (CCPA 1970). , 188 USPQ 356 (CCPA 1976).
